7 | Counsel for Defendant Groupon, Inc.

UNITED STATES DISTRICT COURT

DISTRICT OF NEVADA

10 LAS VEGAS SKYDIVING
11 ADVENTURES, LLC,

Case No.: 2:18-cv-02342-APG-VCF

12 Plaintiff

12

GROUPON, INC.,

Defendant.

**DEFENDANT Groupon, Inc.'s
OPPOSITION TO PLAINTIFF'S
MOTION FOR SPOILATION
SANCTIONS AND SANCTIONS
PURSUANT TO THE COURT'S
INHERENT AUTHORITY [DKT. 23]**

18 Defendant, Groupon, Inc., (“Defendant” or “Groupon”), by and through its
19 undersigned counsel, Greenberg Traurig, LLP, hereby submits this Opposition to
20 Plaintiff’s Motion for Spoliation Sanctions and Sanctions Pursuant to the Court’s Inherent
21 Authority. This Motion is based upon the pleadings on file herein, the attached memorandum of
22 points and authorities, and any oral argument the Court may permit at the hearing of this matter.

23 DATED this 23rd day of July, 2019.

GREENBERG TRAURIG, LLP

/s/ Tyler R. Andrews

MARK E. FERRARIO (Nevada Bar No. 1625)

TYLER ANDREWS (Nevada Bar No. 9499)

Counsel for Defendant Groupon, Inc.

1 **POINTS AND AUTHORITIES**

2 **I. INTRODUCTION**

3 To date, discovery in this case has only affirmed what Groupon has asserted from the
 4 outset: Plaintiff's trademark and antitrust allegations have no merit whatsoever. Yet, rather than
 5 concede defeat, Plaintiff's latest ploy is to bring an unjustified spoliation motion to divert attention
 6 from its deteriorating claims and salvage any possible leverage it can against Groupon.

7 Plaintiff sued Groupon on the twofold theory that (1) Groupon's marketing platform
 8 illegally "controls the prices" of the Las Vegas skydiving market; and (2) that Groupon has
 9 nefariously embedded Plaintiff's trademark "FYROSITY" into its website metadata with the aim
 10 of diverting online customers from Plaintiff to Groupon's affiliates. After this Court allowed
 11 Plaintiff to conduct discovery on these issues, Plaintiff has come up with nothing to substantiate
 12 either theory.

13 For example, on the antitrust front, discovery has established that only three southern
 14 Nevada skydiving companies had ever marketed their businesses on the Groupon platform at the
 15 time Plaintiff filed its complaint (far from the complete market saturation alleged by Plaintiff).
 16 More importantly, those skydiving companies have turned their "deals" on and off at different
 17 times and maintained full control over the terms, timing, and pricing of all the deals offered to
 18 their customers through the Groupon platform.

19 Similarly, on the trademark front, discovery has confirmed that Groupon never once used
 20 the term "Fyrosity" in its keywords or website metadata. In fact, Groupon searched through
 21 hundreds of thousands of web pages throughout its online domain and confirmed that the term
 22 "Fyrosity" has appeared *nowhere* in the metadata underlying its website. What is more, Groupon
 23 confirmed it has never bid on the keyword "Fyrosity" as part of its Search Engine Marketing, nor
 24 has it ever used the term "Fyrosity" *in any capacity* as part of its Search Engine Marketing and
 25 Search Engine Optimization efforts.

26 Out of desperation—and faced with a lawsuit it really has no good faith basis to continue
 27 pursuing—Plaintiff has now manufactured unfounded allegations of spoliation. Plaintiff's
 28 position is based on a misunderstanding (or, worse, a deliberate misstatement) of basic website

1 operation and metadata principles. As explained herein, the metadata that Plaintiff accuses
 2 Groupon of “destroying” is *dynamic* metadata – metadata created by an end user when he or she
 3 enters a search term (in this case “Fyrosity”) on the search page of the Groupon website. While
 4 the resulting metadata for that “Search Results” page obviously must contain whatever term was
 5 searched by the user, that metadata is transient and is not “Groupon website metadata” in any
 6 sense. It does not underlie the fabric of Groupon’s static website, and most importantly, it does
 7 not affect in any way search engine results because such pages are not capable of being crawled
 8 by search engines. Thousands of searches by end users are being conducted every minute and the
 9 nearly infinite variations of transient “search page” results are not the “Groupon website.” Indeed,
 10 the Court has already confirmed this point in its Order staying discovery, distinguishing between
 11 Groupon’s website and Groupon’s search results pages, and finding that “Groupon search results
 12 for ‘skydive Fyrosity’...*do not appear to support an infringement claim*” and ordering that “***no
 13 further discovery is warranted on this issue at this time.***” ECF 19 at 7 (emphasis added).
 14 Plaintiff’s entire motion is therefore based on a disallowed and irrelevant premise.

15 When Plaintiff’s counsel spent hours deposing Pankaj Kumar (Groupon’s director of
 16 Search Marketing) on this topic, he repeatedly and patiently explained these basic website
 17 principles to Plaintiff’s counsel. But the explanations apparently fell on deaf ears. Even so,
 18 Plaintiff’s apparent confusion on this subject could have been clarified further by Groupon had
 19 Plaintiff actually followed local rules and conferred with Groupon before filing this baseless
 20 motion. But Plaintiff was so eager to smear Groupon that it raced straight to court without notice,
 21 failing to meet-and-confer and failing to adhere to this Court’s specific limitations in the Order to
 22 Stay Discovery (ECF No. 19).

23 For all of these reasons, Plaintiff’s motion should be denied and Groupon should be
 24 reimbursed for all fees and costs associated with its response to this motion.

25 II. BACKGROUND

26 A. Plaintiff’s Lawsuit Against Groupon

27 Defendant Groupon, through its Groupon.com website, operates an online marketing
 28 platform where contracting merchants can offer their customers discount vouchers for various

1 goods, services, or experiences, including skydiving experiences. Groupon is one of many options
 2 that local merchants have for marketing services on the internet along with such websites as
 3 Google, Facebook, Yelp, and others.

4 Plaintiff is a company that sells tandem skydiving experiences to consumers in and around
 5 Las Vegas, Nevada, under the FYROSITY trademark. Plaintiff sued Groupon, alleging antitrust
 6 violations, trademark infringement, and related state-law claims. Plaintiff's antitrust claims allege
 7 that southern Nevada skydiving merchants have promoted deals on Groupon's marketing platform
 8 with skydiving prices that are somehow anticompetitive and harmful to Plaintiff. Plaintiff's
 9 trademark infringement and related claims are based on allegations that Groupon has used
 10 Plaintiff's trademark "FYROSITY" in its website metadata.

11 Relevant here are the trademark claims, which are based on two primary allegations. First,
 12 LV Skydiving claims that Groupon's website metadata includes the FYROSITY mark, thus
 13 confusing consumers searching for FYROSITY on search engines and leading them instead to
 14 competing Groupon Affiliates. Second, LV Skydiving claims that, in response to a public
 15 Facebook post on a regional airport's Facebook page questioning whether LV Skydiving was "on
 16 Groupon," Groupon responded by posting a link to a page of search results for the term "skydive
 17 FYROSITY" in Las Vegas, which accurately states that Groupon has "*No matching deals*" for
 18 that term, and instead displays offers from other southern Nevada skydiving merchants.

19 **B. Groupon's Motion to Dismiss, the Stay of Discovery, and Discovery Thus Far**

20 Groupon filed a motion to dismiss (ECF No. 9) and a motion to stay discovery pending the
 21 resolution of the motion to dismiss (ECF No. 12). Groupon's motion to dismiss is fully briefed
 22 and pending ruling by the Court. Groupon's motion to stay discovery was granted but for two
 23 narrow exceptions. First, although the Court indicated that it had "substantial concerns" regarding
 24 the legitimacy of Plaintiff's antitrust allegations of Groupon's control over prices or competition
 25 within the market, limited discovery was permitted as to "who sets the prices that appear on
 26 Groupon's website."¹ See ECF No. 19, at 5. Second, and relevant here, the Court agreed with

27 ¹ Dispositive discovery has now been conducted regarding this issue, including a 30(b)(6)
 28 deposition. At this point it cannot be reasonably disputed that Groupon's various affiliates, and
 not Groupon itself, are responsible for setting customer prices on the Groupon website.

1 Groupon that the very search results page at issue here would *not* support trademark infringement
 2 liability against Plaintiff, and therefore stayed all discovery as to Groupon's post on Facebook, the
 3 resulting Groupon search results page, and all related state law claims. *Id.* at 7 (citing *Multi Time*
 4 *Mach. v. Amazon.com, Inc.*, 804 F.3d 930, 933 (9th Cir. 2015) in finding that "Groupon's search
 5 results for 'skydive Fyrosity' do not appear to support an infringement claim" as "no reasonably
 6 prudent consumer accustomed to shopping online would likely be confused as to the source of the
 7 products.") The Court permitted limited discovery only as to "any use of LV Skydiving's mark in
 8 Groupon's website metadata" and found that "no further discovery is warranted on this [search
 9 results] issue at this time." *Id.* at 7-8.

10 Despite the limited nature of discovery permitted, Plaintiff has aggressively engaged in
 11 expansive requests and deposition topics that stretch, if not exceed, the Stay Order's clear
 12 boundaries. *See Declaration of Tyler R. Andrews Esq., ("Andrews Decl."), attached hereto as*
 13 **Exhibit A**, at ¶ 5. For instance, Plaintiff has requested "any and all Documents that in any way,
 14 in whole or in part, Concern LV Skydiving's Mark," "any and all Documents that in any way, in
 15 whole or in part, depict the text "fyrosity," and "any and all Documents (at any time from January
 16 1, 2016 until the present) that in any way, in whole or in part, Concern [Groupon's] Promotional
 17 Efforts."² *Id.* at ¶ 6. The scope of these requests, on its face, far exceeds the "use of LV
 18 Skydiving's mark in Groupon's website metadata," allowed by the Court. Plaintiff has also taken
 19 two 30(b)(6) depositions, questioning Groupon representatives for nearly seven hours on topics
 20 well beyond those outlined in the Court's clear stay order. For example, Plaintiff spent a
 21 substantial portion of the multi-hour deposition of Groupon's Search Marketing director Pankaj
 22 Kumar questioning him about the never-before-disclosed, unauthorized and self-serving "expert
 23 report" that Plaintiff relies upon in support of this motion. *See, e.g.*, Plaintiff's Exhibit 7, ECF No.
 24 23-7, pp. 52:21-89:9; Andrews Decl. at ¶ 7. Tellingly, the improper expert reports introduced
 25

26 ² Promotional Efforts was defined as "Your online promotional efforts Concerning the Market,
 27 including, without limitation, search-engine optimization techniques (including, without
 28 limitation, use of metadata embodiments), and keyword advertising." The "Market" is defined in
 the complaint as, essentially, tandem skydiving services in the Las Vegas area. *See* ECF No. 1, at
 ¶ 11.

1 during the Kumar deposition and attached to Plaintiff's motion (Exhibit 8) relate exclusively to
 2 the very "Groupon search results" pages that were prohibited as topics of discovery by the Court.
 3 See ECF No. 19 at 8; Andrews Decl. at ¶ 8.

4 Despite this gamesmanship, Groupon has made every effort to comply with Plaintiff's
 5 requests – even when far beyond the scope of the order – in the interest of cooperation and good
 6 faith and to avoid unnecessary court involvement. See Andrews Decl. at ¶ 9. In fact, Groupon's
 7 counsel has participated in at least three separate meet and confer conferences and exchanged
 8 numerous communications with Plaintiff's counsel regarding the scope and manner of discovery.
 9 See Andrews Decl., at ¶ 10. Plaintiff's counsel has never raised the issue of "spoliation" or its
 10 intent to seek sanctions against Groupon during these conferences. *Id.*

11 C. A Brief Primer on Website Metadata

12 1. *What is Website Metadata?*

13 To fully understand the flaws in Plaintiff's spoliation argument, Groupon submits a brief
 14 primer on website metadata for the Court's convenience. Metadata is defined as "data that
 15 provides information about other data." See [https://www.merriam-](https://www.merriam-webster.com/dictionary/metadata)
 16 [webster.com/dictionary/metadata](https://www.merriam-webster.com/dictionary/metadata). In the internet context, metadata is data that provides
 17 information about what is on a web page – for example, the title of the webpage, a description of
 18 the page, and other information about the webpage.

19 2. *Static Websites Versus Dynamic Websites*

20 There are two types of websites: static and dynamic. In a static website, all of the code is
 21 pre-written and delivered directly from the website owner's server to the end-user's browser in
 22 exactly the same fashion. The official website for the United States District Court, District of
 23 Nevada, is a good example of a static website. The content of the pages and the underlying
 24 metadata is likely stored on the server of the US District Court and delivered in that same fashion
 25 to anyone who accesses the District of Nevada URL.

26 A dynamic website, by contrast, varies based on inputs from the user. A search engine
 27 website is an example of a primarily dynamic website. Some of the code and metadata for the
 28 website's foundation may be pre-written and stored, but the search results pages that appear after

1 someone enters a search in the search bar are constructed with scripting created on the user's end
 2 based on the terms the user has searched for. For example, there are virtually infinite possible
 3 variations of Google search results pages, all with different dynamic metadata depending on what
 4 the user entered in the search bar.

5 **D. Groupon's Website**

6 Groupon's website contains both static and dynamic components. For example, Groupon
 7 has hundreds of thousands of pages with static components associated with the specific deals
 8 offered merchant categories, terms and conditions, etc. The code and underlying metadata for
 9 these pages are stored on Groupon's servers and delivered in the same fashion to end users,
 10 regardless of how they are accessed. For example, if you searched in Google for "Groupon Las
 11 Vegas Dinner in the Sky," one of the results would likely be for Groupon's static webpage
 12 promoting the Top of the World Restaurant in the Stratosphere Hotel.

13 In addition to these static webpages, Groupon also has a search bar on its webpages that
 14 allows Groupon customers to perform dynamic searches for specific products, merchants, deals,
 15 or categories:

16 All corresponding search results pages from these user searches are *dynamic*, and are constructed
 17 using the search query information provided by the end user.

18 Put simply, when a person performs a search on Groupon, the searched-for term appears,
 19 automatically and by necessity, in the dynamic metadata for the results page generated by the
 20 search. Below is a clip of the purported evidence of "fyrosity" appearing in Groupon's metadata,
 21 taken from Plaintiff's Exhibit 4:

```
24 <meta property="og:title" content="skydive Fyrosity | Groupon">
25
26 <meta property="og:url" content="https://www.groupon.com/browse/las-
vegas?lat=36.17&lng=
27 115.14&administrative_area=NV&locality=Las+Vegas&address=Vegas,+NV&query=s
kydive+Fyrosity&division=las-vegas&locale=en_US&linkId=55187837">
```

1 See ECF No. 23-4. The reason that the term “skydive Fyrosity” appears here is *not* because
 2 Groupon purposefully placed the term on its website to confuse customers or drive search engine
 3 optimization. Rather, the term appears solely because the particular user *chose to search for the*
 4 *term on the Groupon website.* Anyone can obtain literally any phrase in the dynamic metadata
 5 they want to “appear” on a Groupon search results page by simply typing the phrase into the search
 6 box. For example, when viewing the metadata for the search results on the Groupon website for
 7 the exact phrase “baseless spoliation motions,” the pattern is the same³:

8

```
9 <meta property="og:title" content="baseless spoliation motions | Groupon">
10 <meta property="og:url" content="https://www.groupon.com/browse/las-
11 vegas?lat=36.17&lng=-115.14&locality=Las+Vegas&administrative_area=NV&query=baseless+spoliati-
12 on+motions&address=Las+Vegas%2C+NV&division=las-vegas&locale=en_US">
```

13

14 These terms are generated and appear in the metadata *solely as a result of the search being*
 15 *performed.* This is not part of the Groupon metadata of its website. Importantly, Groupon search
 16 results pages are *not* capable of being crawled by search engines like Google and therefore could
 17 not drive search traffic towards Groupon. Thus, Groupon is not any more likely to appear in a
 18 search engine query for “baseless spoliation motions” just because Groupon’s counsel searched
 19 that term for the purpose of responding to this motion.

20 This Court has already recognized that the only relevant data at issue is “Groupon’s website
 21 metadata,” meaning the metadata actually existing on Groupon’s servers and underlying its static
 22 webpages. Dynamic metadata resulting from a search of a fanciful term by an end user is merely
 23 temporary, it resides only in the end user’s web server. Groupon cannot possibly “possess” all
 24 such metadata, and there is nothing for Groupon to preserve or destroy.

25

26 ³ This experiment can be replicated by going to the Groupon webpage and typing a term into the
 27 search bar. When the results page appears, right click on the page and go to “View source.” This
 28 will show the dynamic page source code, and whatever term was searched for will appear in the
 same metadata locations as the terms discussed here. These terms have no relation whatsoever to
 the metadata used on Groupon’s primary static website.

1 **E. Groupon's Metadata Searches Reveal No Use of FYROSITY.**

2 As Groupon's 30(b)(6) representative explained, Groupon "searched for the term
 3 "Fyrosity" in all of [Groupon's] metadata" to see if it was present. *See Transcript of 30(b)(6)*
 4 Deposition of Pankaj Kumar for Groupon, Inc., June 3, 2019 ("Kumar Transcript"), attached to
 5 the Andrews Decl. as **Exhibit 1**, at 39:6-7. Kumar confirmed without exception that such metadata
 6 did not exist. The reason is simple. As seen above, the code in Plaintiff's "Salient Example" is
 7 merely temporary; the "code is picking whatever is written in the search bar by the customer. So
 8 this is not what we have inserted into our metadata, but this is picked...this is the way this code
 9 works. If I put my name over the search bar, then my name will appear over here." *Id.* at 52:14-
 10 20. As he explained, it is the *search terms themselves* that are inserted into the metadata by virtue
 11 of the search. He reiterated the same later in the deposition:

12 Q: And therefore, at one point in time, that search content has to appear in
 13 Groupon's database, correct?

14 A: No. It's not going anywhere in the [Groupon website] database. It's
 15 just – it stays there, and then it's closed, and then it's gone.

16 Q: Stays where?

17 A: On the metadata, it comes temporarily and then goes away.

18 Q: Okay. So it goes temporarily into the metadata?

19 A: When somebody is searching for that particular term, then it goes into
 20 that. Search for my name, it will go there, and it is not going anywhere or
 21 it's not getting stored anywhere.

22 *See Kumar Transcript, at 78:2-15 (objection omitted).* In short, a consumer search for any term at
 23 all will temporarily appear in the metadata of that particular search results page.

24 **F. The Link to Search Results Does Not Support Plaintiff's Spoliation Argument.**

25 Plaintiff makes much of the fact that this case involves the posting of a *link* on Facebook
 26 to search results, not merely a consumer search. Plaintiff is apparently arguing that because this
 27 search query link can be clicked on and re-run from the Facebook link (which, in turn, creates an
 28 additional "linkID" in the source code), there must be instances of metadata that permanently exist
 somewhere on the internet. However, Groupon's 30(b)(6) representative debunked this very issue:

1 Q: And are you saying, then, that the existence of the Fyrosity text only will arise if someone
 2 clicks into that link on Facebook? A: Yeah. *See Kumar Transcript*, p. 81:20-23. In fact, the
 3 representative explained that he and his team had checked the archival logs for any uses of
 4 Fyrosity, but that it wasn't there because that portion of the code (containing the search term
 5 "Fyrosity") was temporary; the line of code with "fyrosity" in it goes away when the page is closed.
 6 *See id.*, at 100:7-102:3.

7 Indeed, the same type of experiment can be performed using a link to a search as opposed
 8 to a search. An emailed link to a search for "improper discovery tactics"⁴ on Groupon led to a
 9 Groupon search results page that included the following source code:

```
10 <meta property="og:title" content="improper discovery tactics | Groupon">
11 <meta property="og:url" content="https://www.groupon.com/browse/las-
12 vegas?lat=36.17&lng=-
13 115.14&query=improper+discovery+tactics&address=Las+Vegas%2C+NV&division=
14 las-vegas&locale=en_US">
```

Again, this is temporary dynamic metadata that exists simply by virtue of the search, and exists
 nowhere within Groupon's actual website metadata.

Put another way, the link at issue in this lawsuit simply recreates the search from scratch.
 Other than identifying that the search was re-created from a link, there is no difference in output
 between clicking the link or manually searching for "Skydive Fyrosity" in "Las Vegas" from
 within Groupon's search bar. Of note, no metadata is "destroyed" by clicking the link; rather, the
 resulting dynamic metadata (including the temporary "skydive fyrosity" term) can be accessed to
 this day by merely clicking the link again.

In any event, as noted above, this Court expressly stayed discovery as to the trademark
 allegations relating to the Facebook link and the resulting Groupon search results. *See ECF No.*
 19, at 7. Accordingly, this motion – which is based entirely on whether permanent metadata
 underlies the Facebook link – is both procedurally and substantively improper.

⁴ The link was: https://www.groupon.com/browse/las-vegas?lat=36.17&lng=-115.14&query=improper+discovery+tactics&address=Las+Vegas%2C+NV&division=las-vegas&locale=en_US.

1 **III. ARGUMENT**

2 **A. Plaintiff's Motion Should Be Denied Outright Because Plaintiff Failed to Meet and**

3 **Confer on the Alleged Spoliation Issue.**

4 Because Plaintiff failed to meet and confer before filing the instant discovery motion, the
p>5 motion should not be considered. Pursuant to LR 26-7, discovery motions will not be considered
p>6 unless the movant (1) has made a good faith effort to meet and confer as defined in LR IA 1-3(f)
p>7 before filing the motion, and (2) includes a declaration setting forth the details and results of the
p>8 meet-and-confer conference about each disputed discovery request. Here, Plaintiff never informed
p>9 Groupon or its counsel that it believed spoliation was at issue in any form.⁵ Indeed, the rationale
p>10 for a meet-and-confer in this situation is undeniable: Plaintiff apparently believes that Groupon has
p>11 relevant metadata that it has not disclosed through discovery. Rather than running to the Court with
p>12 a needless incendiary sanctions motion, Plaintiff could have simply discussed the issue with
p>13 Groupon, clarified whether or not Groupon is intentionally withholding certain forms of metadata,
p>14 and worked towards an acceptable resolution. Plaintiff, however, did not even request a meet-and-
p>15 confer before accusing Groupon of bad faith conduct. Instead, Plaintiff filed this surprising motion
p>16 as a sandbagging tactic, made even more unreasonable given that Plaintiff *has* met and conferred

17

18

19 ⁵ Although the District of Nevada has sometimes held that sanctions motions arising out of
p>20 discovery disputes are not subject to meet and confer requirements, *see, e.g., Barnum v. Equifax*
Info. Servs., LLC, 2018 U.S. Dist. LEXIS 115543 (D. Nev. 2018) (relying on cases involving Rule
p>21 37(c) and (d)), this does not apply to motions involving spoliation under Fed. R. Civ. P. 37(e). As
p>22 several federal courts have confirmed, spoliation is a discovery issue requiring a meet and confer.
See Travelers Prop. Cas. Co. of Am. v. Mountaineer Gas Co., No. 2:15-cv-07959, 2018 U.S. Dist.
p>23 LEXIS 43208, at *16-17 (S.D. W. Va. Mar. 16, 2018) (“Spoliation motions are the product of
p>24 discovery disputes...requir[ing] the parties to certify that they conferred in good faith.”); *Davila*
v. Teeling, 2017 U.S. Dist. LEXIS 181454, at *2 (E.D. Wis. Nov. 2, 2017) (noting that “[t]here are
p>25 a number of potential procedural problems with Plaintiff’s motions, including a failure to meet and confer
p>26 with opposing counsel about spoliation...”); *Lafountaine v. Reishus*, 2014 U.S. Dist. LEXIS
p>27 120357, at *77 (D. Minn. July 16, 2014) (noting party had failed to satisfy meet and confer
p>28 requirement prior to filing a spoliation motion); *see generally Aspen Med. Prods. v. United
Airlines*, 2016 U.S. Dist. LEXIS 184978, at *1 (C.D. Cal. Jan. 13, 2016) (taking spoliation motion
off calendar and vacating hearing for failure to comply with local rule requiring conference before
filing); *Lopez v. Vidjinovic*, 2016 U.S. Dist. LEXIS 111295, at *13 (N.D. Ill. Aug. 22, 2016) (“If
Plaintiff has a spoliation argument to assert, he should meet-and-confer with defense counsel, and,
if resolution proves elusive, file a motion.”).

1 with Groupon's counsel on several other discovery issues, all of which were resolved without Court
 2 involvement as a result. As such, Plaintiff's instant motion is improper and should be rejected.

3 **B. Plaintiff's Motion Should be Denied Because Plaintiff has Not Met its Burden as to**
 4 **Spoliation.**

5 Even if this Court reaches the merits of the motion, Plaintiff has failed to demonstrate any
 6 evidence of Groupon's alleged spoliation. Spoliation is the destruction of, alteration of, or failure
 7 to preserve evidence. *See, e.g., Smith v. Wal-Mart Stores, Inc.*, 2014 U.S. Dist. LEXIS 83005, at
 8 *14 (D. Nev. June 17, 2014) (Ferenbach, M.J.) ("Spoliation is the destruction or significant
 9 alteration of evidence, or the failure to preserve property for another's use as evidence in pending
 10 or reasonably foreseeable litigation."). As of 2015, Federal Rule 37(e) provides the relevant
 11 standard for sanctioning such conduct; given both the severity of the accusation and the severity
 12 of the effect of spoliation on a case, courts treat it with great caution.

13 As an initial matter, "before a court will sanction a party for spoliation of relevant evidence,
 14 the moving party must demonstrate that the relevant evidence existed." *See Garcia-Garrido v.*
 15 *Outback Steakhouse of Fla., LLC*, 2018 U.S. Dist. LEXIS 90192, at *12-13 (D. Nev. May 30,
 16 2018). A court may then impose sanctions under Rule 37(e) only if it finds "(1) [the party] failed
 17 to preserve ESI 'that should have been preserved' in anticipation or conduct of litigation; (2) the
 18 information was lost because [the party] failed to take reasonable steps to preserve it; (3) the ESI
 19 cannot be restored or replaced; and (4) the plaintiffs were prejudiced by the loss." *Small v. Univ.*
 20 *Med. Ctr.*, No. 2:13-cv-0298-APG-PAL, 2018 U.S. Dist. LEXIS 134716, at *236-37 (D. Nev. July
 21 31, 2018). Only if *all* of these prerequisites are met may a court issue sanctions, and even then,
 22 those sanctions must be no greater than necessary to cure the actual prejudice caused by the loss
 23 of evidence. *Id.* The most severe sanctions, such as the adverse inferences sought by Plaintiff,
 24 may be imposed only if the Court finds that the party acted with intent to deprive. *Id.* Here, despite
 25 admitting that it bears the burden of proof (ECF No. 23, at 5), Plaintiff fails to meet a single
 26 necessary requirement to establish spoliation. As such the motion should be denied.

27 ***First,*** Plaintiff has come forward with nothing indicating that there was any use of
 28 FYROSITY in Groupon's searchable website metadata. *See Putscher v. Smith's Food & Drug*

1 *Ctrs.*, 2014 U.S. Dist. LEXIS 85024, at *18 (D. Nev. June 20, 2014) (Ferenbach, M.J.) (denying
 2 motion for spoliation sanctions where the plaintiff had come forward with no evidence that certain
 3 surveillance footage ever existed to begin with); *Smith v. Wal-Mart Stores, Inc.*, 2014 U.S. Dist.
 4 LEXIS 83005, at *16 (“Smith’s motion for spoliation sanctions is meritless. There is no indication
 5 that relevant evidence ever existed.”). Plaintiff’s ignorance as to the difference between dynamic
 6 and static webpages can certainly not serve as the basis for “spoliation” against Groupon. Indeed,
 7 Plaintiff’s only purported evidence on this point -- temporary dynamic webpage metadata
 8 generated by a search query – has no connection whatsoever to actual instances of FYROSITY in
 9 use on Groupon’s website servers. As explained above, Groupon’s 30(b)(6) representative
 10 testified that this metadata does not exist, and that search terms are temporary and therefore not
 11 stored on Groupon web servers.

12 Given these facts, the false premise underlying Plaintiff’s entire motion falls apart. As one
 13 federal court remarked, a court “cannot simply *assume* that, because [the plaintiff] is in possession
 14 of certain emails between [the defendant] and [the plaintiff] that [the defendant] did not produce
 15 in this case, that other e-mails between the companies or internal [defendant] emails must have
 16 existed and were not produced.” *See Point Blank Sols., Inc. v. Toyobo Am., Inc.*, 2011 U.S. Dist.
 17 LEXIS 42239, at *67 (S.D. Fla. Apr. 5, 2011) (emphasis in original); *see generally Epstein v. Toys-*
 18 *R-Us Del., Inc.*, 277 F. Supp. 2d 1266, 1276-77 (S.D. Fla. 2003) (failure to produce video of
 19 incident was not evidence that the video ever existed or had subsequently been destroyed, as would
 20 be required for a claim for destruction of the tape). Here, no data was destroyed; the link is still
 21 active and can be clicked again at any time.

22 To bolster its position, Plaintiff relies on an improper 27-page supplemental “expert report”
 23 which responds to Groupon’s 30(b)(6) witness’ testimony and hypothesizes that some theoretical
 24 use of the term “Fyrosity” might exist on Groupon’s web server log files as a result of the Facebook
 25 link and resulting search results page. *See ECF No. 23, Exhibit 8, at ¶ 35.* As an initial matter,
 26 the entire report should be excluded as it relates exclusively to the very discovery topics prohibited
 27 in this Court’s stay Order. *See ECF No. 19 at 7-8.* Yet even setting aside the report’s blatant
 28 impropriety, and even assuming that Plaintiff’s “expert” is correct that some other FYROSITY

1 dynamic metadata might exist undiscovered somewhere out in the vast internet ether, this would
 2 not amount to spoliation. *See, e.g., Garcia-Garrido*, 2018 U.S. Dist. LEXIS 90192, *12-13
 3 (argument that defendant “destroyed evidence” by “failing to conduct a more thorough
 4 investigation” rejected and spoliation motion denied). In fact, Plaintiff has not even *alleged* that
 5 Groupon “destroyed” the supposed metadata at issue here. At the very most, Plaintiff could have
 6 (and should have) brought a motion to compel any additional information that it believes exists
 7 but that has not yet been produced.

8 ***Second***, Plaintiff has failed to show that any information was lost *because Groupon failed*
 9 *to take reasonable steps to preserve it*. Indeed, Plaintiff has no evidence that any information was
 10 “lost,” in the first place, as Plaintiff clearly maintains the very same “Salient Example” it alleges
 11 was “disclaimed” by Groupon. But even accepting Plaintiff’s argument that Groupon somehow
 12 destroyed or altered the very evidence that remains in Plaintiff’s own possession, Plaintiff certainly
 13 has no evidence that Groupon failed to take reasonable steps to “preserve” any dynamic webpage
 14 metadata, which by its very nature cannot be “owned” by Groupon or “preserved” in any
 15 meaningful sense. Likewise, Plaintiff has not shown that if information *was* lost, it cannot be
 16 easily restored or replaced (which here can be done by simple typing in the same query into the
 17 Groupon.com search box, as explained above). Failure to demonstrate this requirement is fatal to
 18 Plaintiff’s motion.

19 ***Third***, even if Plaintiff’s allegations somehow gave rise to spoliation, Plaintiff has not
 20 stated how it was prejudiced by the alleged loss. Plaintiff argues that it need not show prejudice
 21 where there was an “intent to deprive,” but again, Plaintiff has not demonstrated how or why
 22 Groupon “intended to deprive” Plaintiff of anything. At most, Plaintiff’s entire motion is based
 23 on a semantic disagreement over the term “metadata,” caused by Plaintiff’s misunderstanding of
 24 simple website operation – again, one that could have likely been resolved had Plaintiff bothered
 25 to meet and confer before filing a motion accusing Groupon of bad faith spoliation.

26 Further, Plaintiff could not possibly suffer prejudice here because even assuming Plaintiff’s
 27 position was accurate, dynamic webpage metadata *cannot give rise to liability for trademark*
 28 *infringement*. Even in the rare instances where courts have found liability for infringement based

1 on metadata use in the past, the cases are largely set during the internet's early days where
 2 competitors sometimes *intentionally* placed metatags on their site for the very purpose of *confusing*
 3 *consumers*. A competing cola company, for example, might embed the word "PEPSI" as a meta-
 4 tag in its website code to "trick" search engines into returning its page as a result when a consumer
 5 searched for "Pepsi" instead. As explained in Groupon's motion to dismiss, this tactic died off
 6 years ago, and no modern search engines continue to use metatags for this purpose. *See, e.g.*,
 7 *Network Automation, Inc. v. Advanced Systems Concepts, Inc.*, 638 F.3d 1137, 1146 n. 3 (9th Cir.
 8 2011) ("Modern search engines such as Google no longer use metatags. Instead they rely on their
 9 own algorithms to find websites.").

10 But even assuming this practice was still in use, the dynamic "metadata" at issue in
 11 Plaintiff's motion has nothing to do with the intentional placement of a competitor's trademark in
 12 the underlying code of Groupon's website. Rather, the alleged metadata in Plaintiff's "Salient
 13 Example" is *incidentally* generated as a result of the posted search query. It would be literally
 14 impossible for Groupon (or any search engine, for that matter) to control the various search queries
 15 entered in order to create the dynamic metadata at issue. It certainly could not "place" such
 16 metadata to "confuse" customers regarding LV Skydiving or its trademarks.

17 For all of the above reasons, this Court should find that no spoliation occurred, and
 18 therefore deny Plaintiff's motion for spoliation sanctions.

19 **C. Plaintiff's Request for Sanctions Against Groupon Should Be Denied.**

20 Plaintiff asks for a panoply of extraordinary relief for Groupon's alleged "spoliation": not
 21 only attorneys' fees, costs, and monetary sanctions, but also an adverse inference and a
 22 presumption that Groupon is liable for all of Plaintiff's intellectual-property related claims.
 23 Needless to say, these requested sanctions are baseless and unwarranted.

24 Plaintiff is limited to seeking sanctions under Rule 37.⁶ Rule 37(e) provides a two-part
 25 framework for sanctions. Under Rule 37(e)(2), it is "**only upon finding**" that the party acted with
 26

27 ⁶ Plaintiff requests sanctions both under Rule 37 and the court's inherent authority. Neither are
 28 appropriate for the reasons stated herein, but after the 2015 amendments to Rule 37, use of the
 inherent authority for spoliation sanctions regarding ESI is expressly foreclosed. *See* Advisory
 Committee Notes, Fed. R. Civ. P. 37 (explaining that because the rule now authorizes specific

1 the intent to deprive” the other party of the information’s use in litigation that the Court may order
 2 the “severe” sanctions of a presumption “that the lost information was unfavorable to the party
 3 that lost it, permissive or mandatory instruction to the jury that the information was unfavorable
 4 to the party, or the dispositive sanctions of dismissal or default.” *See Fed. R. Civ. P.* 37(e)(2)
 5 (emphasis added); *Small*, 2018 U.S. Dist. LEXIS 134716, at *233. “Intent to deprive” does not
 6 encompass negligence or even gross negligence. *See Advisory Committee Notes to Rule 37.*
 7 Plaintiff has not come close to meeting this high standard here. *See Gaina v. Northridge Hosp.*
 8 *Med. Ctr.*, 2018 U.S. Dist. LEXIS 223852 at *13-15 (C.D. Cal. Nov. 21, 2018) (court found “no
 9 intent to deprive” defendant and no basis to impose the “harsh” and “severe” sanctions available
 10 under Rule 37(e)(2) even when plaintiff sold cell phone containing important text messages
 11 relevant to case); *Porter v. City & Cty. of S.F.*, 2018 U.S. Dist. LEXIS 151349, at *12-13 (N.D.
 12 Cal. Sep. 5, 2018) (deletion of recorded phone call pursuant to data retention policy, despite having
 13 received a preservation notice, was insufficient to trigger 37(e)(2) where there was no evidence
 14 that the defendant intentionally spoliated the recording.)

15 Accordingly, even if spoliation had occurred here, sanctions would be limited to those
 16 authorized under Rule 37(e)(1). That provision simply allows the court to, “upon finding
 17 prejudice” to the moving party, “order measures no greater than necessary to cure the prejudice.”
 18 *See Fed. R. Civ. P.* 37(e)(1). Here, Plaintiff has not demonstrated *any* prejudice as a result of
 19 Groupon’s allegedly incomplete search for FYROSITY metadata, so it is impossible to know what
 20 sanctions could even theoretically “cure” the alleged wrongdoing. Where there has been no
 21 prejudice, sanctions are not warranted. *Hernandez v. Tulare Cty. Corr. Ctr.*, 2018 U.S. Dist.
 22 LEXIS 21159, at *17 (E.D. Cal. Feb. 7, 2018) (sanctions not warranted where county deleted video
 23 evidence of plaintiff’s injury, where the plaintiff was not prejudiced by the loss). As neither prong
 24

25
 26 measures a court may employ if information that should have been preserved is lost, the rule
 27 “forecloses reliance on inherent authority or state law to determine when certain measures should
 28 be used.”); *see also Newberry v. Cty. of San Bernardino*, 750 F. App’x 534, 537 (9th Cir. 2018)
 (unpublished disposition) (noting that Rule 37(e) was the proper vehicle for spoliation sanctions
 motions post-2015 amendments).

1 of Rule 37(e) has been met, this Court should deny sanctions even assuming Plaintiff's motion
2 held merit..

3 **D. This Court Should Award Groupon Reimbursement of Fees and Costs from Plaintiff.**

4 This Court should award Groupon sanctions against Plaintiff pursuant to LR IA 11-8
5 covering all fees and costs necessary in responding to the motion. The Court may, "after notice
6 and an opportunity to be heard, impose any and all appropriate sanctions on an attorney or party
7 who...fails to comply with these rules; or...fails to comply with any order of this court." See LR
8 IA 11-8. Further, "...the court may impose appropriate sanctions under LR IA 11-8 for a party's
9 failure to comply with the meet-and-confer requirement." See LR IA 1-3.

10 Sanctions are warranted here. Not only did Plaintiff fail to meet-and-confer, Plaintiff
11 violated this court's clear order limiting discovery by engaging in prohibited expert discovery, and
12 compounded this error by filing a needless motion accusing Groupon of bad faith misconduct
13 based solely on Plaintiff's own flawed understanding of dynamic website metadata and how the
14 internet actually works. Accordingly, sanctions in the amount of the attorneys' fees and costs
15 incurred by Groupon in responding to this baseless spoliation motion are warranted.

16 **IV. CONCLUSION**

17 In light of the foregoing, Groupon respectfully requests that this Court DENY Plaintiff's
18 motion for sanctions, and award Groupon all reasonable attorney's fees and costs incurred in
19 responding to Plaintiff's unnecessary and wasteful motion.

20 DATED this 23rd day of July, 2019.
